

BACKGROUND

Institute Gustave Roussy is the one of the most comprehensive leading Cancer Centres in Europe well known for deploying cutting-edge research with the aim of making major discoveries and using the most modern technologies. The Institute was founded as a result of the motivation of Professor Gustave Roussy, the father of the concepts of “cross-boundary working” and “multidisciplinary patient management”. All of this is built on the three guiding principles: patient care, research and teaching. Host of NorMM 2016 is Professor Karim Fizazi from Institut Gustave Roussy, Villejuif in France.

Three topics will be highlighted at the Institut Gustave Roussy visit:

- **MDT**
Multidisciplinary procedures in prostate cancer at Institute Gustave Roussy. Structured follow up procedures after MDT conferences.
- **Translational research**
Optimal research strategy from bench to bedside, to ensure outcome from researchers and clinicians work. How to perform a faster, structured evaluation of real-world data with new prostate cancer medications.
- **Education**
Ways of recruiting young doctors for uro-oncology at an early stage. Recommendations for building school of cancer treatment.
